WORK EXPERIENCE

Associate Software Engineer (Frontend)

Innovaccer Analytics Private LTD.

09/2021 - Present

Noida, India

It is a health cloud company dedicated to accelerating innovation in healthcare to connect and curate the world's healthcare information.

Responsibilities

- Develop and ship highly interactive web applications for Incare which is one of the biggest revenue-generating products of Innovaccer.
- Worked with a variety of different languages, and frameworks such as TypeScript, ReactJS, Redux, Node.js, etc.
- Tested many functionalities via Jest (for unit-testing), Enzyme (for component testing), and Cypress (for end-to-end testing).
- Communicate & collaborate with various teams of engineers, and designers on a regular basis and recently attended many client calls.

PERSONAL PROJECTS

Weather Component (01/2023 - Present)

- A generic component that helps users to get the weather update of their current location. Also, they can search based on specific locations by city and by pin code. In addition to this, the user can get forecast reports of the upcoming 15 days of data
- This is my personal project to explore Webpack and also, learn the creation of an npm package and push it to a local npm registry
- [Video Link](#)
- Tech-stack: ReactJS, Redux, TypeScript, Jest

Trello Clone Application (03/2022 - 03/2022)

- It's a replica of the Trello todo application, where users can create and manage their TODOs on multiple boards
- [Website Link](#) | Hosted on codesandbox
- Tech-stack: ReactJS, Redux, Masala Design System
