

Souvik Ghosh Software Developer II

✉ ghosh.souvik65464@gmail.com ☎ 8450042512  LinkedIn  Github  Gitlab  Profile

Senior Frontend Engineer with ~4.5 years in React and TypeScript, building real-time, EdTech, and B2B apps for 90K+ users in product and product-engineering companies, focused on performance, reliability, and scalable architecture.

SKILLS

EXPERIENCES

Technologies and Tools
React v19+, JS ES2020+, Typescript, TSX, SCSS, Service Worker, Vite, Webpack, Babel, Tarbo

State Management
React Hooks, Context API, Redux, React Query, Zustand, RTK Query

Version Control & Project Management
Git, GitHub, GitLab, Jira, Azure DevOps

AI Tools and Technologies
Claude Code, Copilot, QodoGen, ChatGPT, Perplexity Pro, Gemini, Ollama, N8N Workflow

Have knowledge
Node.js, Express.js, Next.js, MySQL, MongoDB, Python, Cypress, Docker & Kubernetes

EDUCATION

Bachelor of Technology (B.Tech) - MAKAUT
Howrah, West Bengal
CGPA: 9.34/10

Rootquotient - SDE II
Jul 2024 – Present | Chennai

- Architected optimised CI/CD pipelines (Github Action, Azure DevOps and AWS) across Organization; enabled zero-downtime deploy with artifacts.
- Established real-time & performance best practices (Optimization, Code Splitting, Lazy Loading, Web Vital and WCAG/A11Y) adopted by 3+ teams org-wide.
- Achieved 99.8% uptime; managed 10K+ concurrent users efficiently.
- Mentored 5+ developers; achieved 3 SDE1 and 2 SDE2 promotions; improved velocity by 35%.
- Conducted 5+ tech interviews; hired 2 engineers; established evaluation framework.

Rootquotient - SDE I
Apr 2023 – Jun 2024 | Chennai

- Drove state management & API integration strategies across 2+ projects.
- Led peer reviews establishing React best practices; configured ESLint + Prettier and Git hooks reducing review cycles by 35%.
- Identified bottlenecks; coached team on profiling tools and optimization.
- Coordinated with product/design on technical feasibility; maintained 100% on-time sprint delivery.
- Created architecture documents (confluence) for complex patterns; conducted pair programming sessions.

Innovaccor - Associate Engineer
Sep 2021 – Apr 2023 | Noida

- Built and shipped complete features across 50K+ users in the healthcare platform; participated in sprint planning and quality assurance.
- Achieved 54% to 87% test coverage; reduced post-release defects by 20%.
- Worked with cross teams (design/backend/product) across 3+ products.

PROJECTS

PAMs: Real-time Incident Management Platform

- Stabilized codebase by resolving 150+ bugs in a sprint and leading a zero-defect UAT release for emergency services.
- Architected a WebSocket synchronization (connection pooling, auto-reconnect, message queuing) system across 2+ admin apps, reducing data inconsistency by 70%.
- **Key Tech:** React v18.3, react-query, socket.io, react-google-maps, react-hook-form, dnd-kit, RTL, MSW

Play Pixo: Multi-app EdTech Platform

- Built a customise heavy rich-text editor serving 5 modular apps and integrated Razorpay with secure token auth to handle 59K+ monthly transactions.
- Developed a role-based coupon system & generation and admin notification tools, driving 15% higher conversions and 2x parent engagement.
- **Key Tech:** React, Razorpay Integration, react-window, Zustand, lottie-react, recharts, Material UI

PriceFx - B2B Pricing Management Platform

- Refactored data-heavy pricing calculators using memoization and virtualization, improving render speeds by 82%.
- Implemented Microsoft SSO (OAuth2) for secure access and built batch fetching & offline-first capabilities using IndexedDB for field usage.
- **Key Tech:** React v18.2, IndexedDB, persist-client, MSAL (SSO), react-window, axios, BFF, Ant Design
